

Hose Management Services

For onshore and offshore installations

Hose Management Services

Tailored expert solutions for the maintenance of your flexible hose assemblies.

Safe operations.
Reliable performance.
Reduced risk.

Effective hose management is essential to keep offshore and onshore operations running safely and efficiently.

Our expert teams support you throughout the full lifecycle of your flexible hose assemblies, helping to reduce downtime, improve productivity, and maintain compliance.

Why choose ContiTech?

Safety and compliance

Inspection, testing, and certification aligned with industry standards and best practices.

Operational reliability

Proactive lifecycle management that minimizes failures and keeps operations running smoothly.

Digital traceability

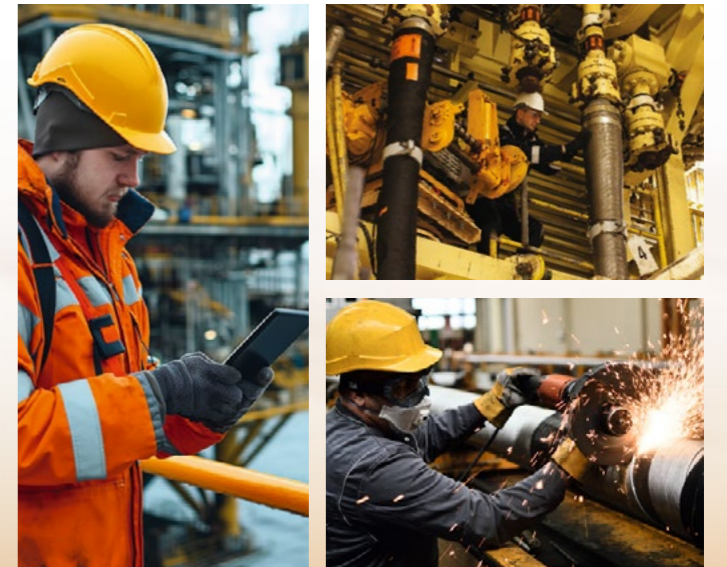

Web based hose registers, and service life analysis for full visibility and control.

Global expertise

Decades of engineering experience supporting international oil and gas operators.

Our hose management services:

- › **Inspection, testing, and integrity analysis**
- › **Inventory and lifecycle management**
- › **Repair and recertification of hoses**
- › **Training for safe hose handling and maintenance**

We inspect. We test. We repair. We certify.

Complete Lifecycle Management for Flexible Hose Assemblies.

From installation to replacement, our expert services support the safe, efficient, and compliant operation of your hose systems at every stage of their lifecycle.

Inspection & Testing

Complete inspection and testing services for reliable FHA performance

We provide a complete range of inspection and testing services, including external inspection, high pressure testing, internal boroscope inspection, and recertification. Testing and inspection can be carried out in dedicated facilities at strategic locations worldwide or at your preferred location.

Inventory Management

Full visibility of your FHA assets worldwide

Continental Asset Management is a web based inventory management program designed to give you instant overview and peace of mind. The system enables you to monitor the current status of all FHAs across installations worldwide, schedule maintenance, plan replacements, and ensure trouble free operations.

Repairs

Cost effective repair solutions to extend service life

When appropriate, our technicians may recommend repair as the most efficient and cost effective solution. We can repair surface damage to hose outer covers, and damage to external armour to restore operational reliability.

Training

Practical training for safe handling and longer hose life

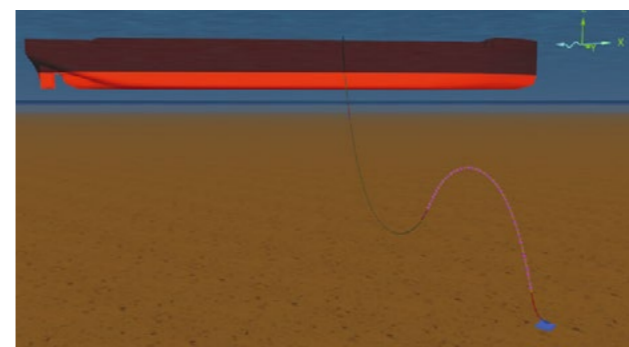

Correct handling and maintenance of FHAs in the field helps improve equipment service life. We offer a variety of training programmes based on Energy Institute Guidelines for the Management of Flexible Hose Assemblies (2025), and can tailor courses to specific operational requirements.

Installation and Commissioning

Expert support from specification to operational deployment

With in depth expertise across all aspects of fluid transfer in the oil and gas industry, we support specification, installation, commissioning, and change out of FHAs and systems. This includes high pressure drilling, production, utility, GMPHOM 2009, turret, and FPSO seawater inlet hoses.

System Analysis

Engineering analysis for optimal hose performance

Our static analysis tools help ensure your FHAs are correctly specified for each application. Dynamic and other statistical analyses predict hose behaviour in challenging conditions and help improve equipment service life.

GLOBAL REACH. LOCAL EXPERTISE.

Wherever Energy Flows, We Support It.

Wherever You Operate, We're Already There.

From Houston to Singapore, our specialists understand your regional standards, regulations and project challenges.

- › 20+ Global Sales Locations
- › Fast Response Times.
- › Specialized Oil & Gas Support
- › Regional Sales Engineers in 12 Countries
